

Copy Cataloging Libraries: OCLC Group Services Cost Scenarios under Local Formula.

Local formula is based on:

- Academic: FTE students
- Public: Paid staff based on FTE count
- Schools: OPI required librarians, linked to your September enrollment count
- Special: Paid staff based on FTE count

* Public/School combined libraries' fair share of the statewide OCLC contract has been determined to be their cost calculated as if they were either a school library, or a public library, whichever is higher. Being combined, these libraries do not have to pay the sum of their public and school shares; however, in the interest of statewide fairness and equity, they do pay the single higher amount.
